Dust Bunny is a correct, big boned/framed heifer. She is a beautiful light brown with black brindle (Who doesn't love brindle?!). She is out of one of our best foundation cows, Stardust, who is a fantastic mother and a milking machine. Her sire, Star Extraordinaire, was a young bull we owned for a couple of years and then sold. He produced a bunch of heifers who had bone structure and correctness like Dust Bunny. "Extra" was also a TLBAA
